ColorChord

Paint to make music.

Pierre Arthur Tchio Seme · SAIT, Calgary · InnovArt 2027

Why

- Synesthesia: Kandinsky "heard" colours
- Music and visual art are usually taught separately
- Beginners find instruments intimidating

How it works

- 7 colours → Do Re Mi Fa Sol La Ti
- Height → octave · Speed → volume & brush width
- Major / Pentatonic / Minor change the mood

Live demo

Paint · switch scale · replay · save

Technology

- HTML5 Canvas + Pointer Events (mouse, touch, stylus)
- Web Audio API oscillators with envelopes
- No install: runs in any modern browser

Impact & next

- Classrooms: colour theory + scales in one activity
- Next: collaborative canvas, MIDI export, colour-blind mode

Thank you
